H/S Catheter

The Uterine Infusion Catheter family comes in a standard configuration or with an integrated stylet. Both versions are minimally invasive, easy-to-use devices that ensure a diagnostically enhanced*, yet gentle, patient exam. Designed for use in saline-infusion sonohysterography and hysterosalpingography.

H/S Catheter with Integrated Stylet

Based on the original Ackrad round, latex-free, balloon catheter design, this is used when additional catheter rigidity is needed.
